

Inc. Village of Valley Stream Private Sewer Lateral Repair Program

Opt-Out Form 2023

Open Enrollment Period: February 15th to March 15th

We are excited to continue to offer you the opportunity to participate in the Village of Valley Stream Private Sewer Lateral Repair Program. This program has protected your neighbors from the unforeseen costs and hassles of repairing or replacing their private sewer lateral. In the first year of the program, we have seen and fixed many different types of issues such as gas line cross-bores, root intrusion, collapsed pipes and separated joints.

Your private sewer lateral is the pipe that connects the plumbing in your home running under your front yard and connecting to the sewer main in the street. It is your responsibility as a homeowner to maintain and repair this underground pipe to ensure that there are no leaks or breaks. The average home in Valley Stream has its original sewer lateral from the 1950s that has exceeded its working lifespan of 50 years. If ignored, this outdated sewer lateral will break, crack, and leak, causing sewer backups in your home often leading to tremendous unforeseen expenses for homeowners.

This is the second annual enrollment period for the program. If you received this mailing, it means that you are currently enrolled in the program as you did not opt-out last year.

To remain in the program for the coming year, no further action is required.

To opt-out of the program, please complete this form and return it in the enclosed envelope prior to Wednesday, March 15th.

I wish to Opt-Out of the program. I understand by checking this box and opting out of the program, I will not be enrolled in the Private Sewer Lateral Repair Program.
